### BOYCOTT THE BOSSES REFERENDUM

**All immigrants are welcome we are one working class**

**Unite European and British workers**

**Solidarity with French workers**

#### Boycott because:

- This referendum was not called by workers.
- Leave or Remain camps are about defending profits and London's financial centre.
- Both sides attack workers here and in Europe and want to annihilate workers rights.
- Casualisation and zero hour contracts are becoming the European norm – affecting two million UK workers and rising.
- The racist war against immigrants is worsening across Europe.
- Cameron's deal with the EU is about creating xenophobic divisions between European and British workers.

Both Tory Yes and Tory No support accelerating NHS privatisation and privatising education and public services. Both attack the

In or Out billionaire Mike Ashley Sports Direct boss and the like pay below the minimum wages and instil fear and suffering in the work place.

London the “Most corrupt place on Earth” says anti mafia writer Roberto Saviano, “what is corrupt is the financial capital. Ninety per cent of the owners of capital in London have their headquarters offshore.”

rights of immigrants, both will cut wages and conditions, both will limit the right to strike, both will brutally attack the unemployed by making it harder to claim benefits. They only differ in how to do it!

Yes and No want London's financial centres to continue as the centre of world exploitation. And both sides will ensure the existence of unregulated off shore accounts.

The Labour leadership says workers are better off in Europe – where attacks on workers continue unabated. Look at Greece, Spain, Ireland and Portugal and the huge increase in unemployment and precariousness.

Defenders of the NO, like Socialist Party, are not calling for full rights for immigrants but use left words against capitalism.

The working class in France is in the vanguard, with sectors of industrial workers such as ports, oil, energy and nuclear power stations and transport. In addition there are local strikes in many other sectors (trade, construction, industry, post, cultural and health). 19 May, brought together 100,000s of people, night rallies

(“Nuit Debout”) are mobilising young people and blockades being built all across France.

The French are showing us that only a mass workers mobilisation on the streets will end austerity – European and British.

Only a mass workers movement for socialism will put an end to reactionary

governments and the EU

International Socialist League defends the right of oppressed new semi-colonies like Greece and Ireland to leave the EU. We do not support either side of this ruling class referendum.

**For a Socialist and Workers Europe**
